

Spoštovani,

s tem pismom potrjujemo, da smo v zimski sezoni 2011 – 2012 testno opremili dva avtocestna odseka na avtocesti A2 s polikarbonatnimi odsevnimi snežnimi količki, ki jih je za nas proizvedlo podjetje Starplast d.o.o. Semič. S količki smo bili zadovoljni, saj so se izkazali z izjemno vidnostjo v pogojih teme, dežja, megle in sneženja. So tudi enostavni za vzdrževanje med in ob koncu sezone in zelo trpežni.

Andrej Sever, vodja službe za tehnično pripravo

To whom ever it may concern,

with this letter we are confirming that during the winter season 2011 - 2012 we equipped two sections of our highway A2 with polycarbonate retro reflective snow poles for internal test purposes. Snow poles were produced by Starplast d.o.o. Semič.

We were satisfied with the snow poles as they proved themselves with high visibility in dark, rain, fog and snow conditions. Snow poles are also easy to maintain during and at the end of the season and highly durable.

Sincerely,

Andrej Sever, head of technical preparation
